## Our Business Creed

We believe in the goods we are  
handling out in the firm we are build-  
ing up and in our ability to get results.  
We believe that honest goods can be  
passed out to honest people by honest  
methods. We believe in working hard  
and not knocking, and in the  
pleasure of our work, we believe that  
man can reasonably expect to get  
that he goes after, that one dead done  
now is worth two planned for the fu-  
ture. We believe there is something  
doing somewhere for every man ready  
to do it. We believe we're ready right  
now.

Plans and specifications  
prepared, estimates given  
on all kinds of buildings.

Brick, Lime, Builders' Supplies

Lumber of All Kinds

## COLEMAN PEBBLES

Happenings of Interest in and  
Around this Bustling Town.  
You are Talked About

Magistrate E. Diney spent several  
days at Lethbridge this week.

G. L. Fraser and wife of Lethbridge,  
spent several days in town this week.

Baptist service will be held on Sun-  
day afternoon at 3 o'clock, in the Odd  
Fellows hall.

Anyone not receiving the MINER,  
will confer a favor if they will report  
at the office.

Harvest thanksgiving service will  
be held in St. Alban's church next  
Sunday evening.

Rev. T. M. Murray will preach on  
"Ideals in Politics" on Sunday even-  
ing, 11th instant.

The Conservative committee rooms  
are open every day and evening at  
the Pacific hotel.

Oysters, oysters, fresh every Wed-  
nesday. They are fine. Come and  
try them. "The Palm."

George Gage is on the job again as  
day operator at the station, and A. A.  
Kott is the night operator.

Mrs. J. McNeill and son Paul arrived  
home from Cranbrook on Monday  
evening after spending two weeks in  
the B. C. town.

WANTED—Position by a reliable  
young man, 51 years in grocery and  
hardware store. Frank M. Green,  
Coleman, Alberta.

A large gang of men have been at  
work the past two weeks putting in  
another siding at the tipple, and fix-  
ing the track in town.

The Baptists of Blairmore contem-  
plate building a church this fall. A  
subscription list is in circulation, and  
is being well patronized.

Mr. Oliver, who has been night  
operator at the station for the past  
five months, left last week for his  
home at Edmonton.

It is expected the Hon. W. H. Cus-  
hing will speak at Mr. John Her-  
ron's meeting next Wednesday evening.  
This will make it interesting.

Work on the new addition of A.  
Cameron's block for Ouimet, Wright  
& Co. commenced on Monday morn-  
ing by T. W. Davies.

It is understood that Mr. H. J.  
Matheson, formerly licensed Liberal  
agent for the Peace and has the con-  
trol of the work of that party.

Messrs. R. Dunlop and J. Graham  
will open the Pacific hotel next Thurs-  
day the 14th. These young gentlemen  
should get a large patronage, as they  
are very popular in Coleman. The  
house is being renovated and put in  
first class order.

Messrs. A. C. Fumelbert and H. N.  
Galer spent Tuesday and Wednesday  
in town. They went to Lethbridge on  
Wednesday evening. The gentlemen  
visited the Miner office for the first  
time, and complimented us on the  
splendid plant and the good paper  
being printed.

D. J. Lewis, a miner, was severely  
hurt in the mine on Wednesday after-  
noon by a rock falling on his hips.

He was immediately taken to the hos-  
pital and received medical attention.  
This is the second time Mr. Lewis has  
been injured during the last three  
months. His many friends will be  
pleased to see him about again soon.

When one young man was about to  
retire on Monday night at the Cole-  
man, on turning down the bed clothes  
to get into his comfortable nest, he  
discovered that some miscreant had  
put one of the new steam radiators  
under his bed. He was so startled that  
he jumped back as though nothing had  
happened. Doubtless to say the gen-  
tleman in his night robe had a tussle  
with the 800 pound radiator.

A number of people have asked the  
Miner if it is correct to say: "A bunch  
of men." How can it be correct? It  
is only the past year or so that this  
"bunch" phrase has taken root. If it  
is correct to say "a bunch of men," it  
should be correct to say "a crowd of  
cattle," or "a crowd of flowers." It  
seems the custom now-a-days to put  
the cart before the horse. One will  
hear the expression "They are a rotten  
bunch," meaning a number of men.  
A bunch of flowers may be said  
"rotten," a crowd of men may be said

**BIRTHS**  
On September 30, to Mr. and Mrs.  
Mike Kipta, a son.

On October 2, to Mr. and Mrs. Fred  
Cote, a daughter.

On October 4, to Mr. and Mrs. Frank  
Leary, a daughter.

On October 6, to Mr. and Mrs. Sol-  
man, a daughter.

On October 8, to Mr. and Mrs. James  
Burrows, a son.

**AN ELOPEMENT**  
On Saturday night Mr. Thomas  
Merryman eloped with a boarder  
named Ben Bece. When Mr. Merry-  
man arrived home he found the work  
at the mine on Saturday night at 11  
he got a note, written on a piece of  
wrapping paper, by his wife, telling  
him she would see him in the spring.  
Warrants were issued and the pair  
were located at Moose Jaw. They  
will be brought back to Coleman. It  
is said Mr. Merryman took considerable  
money from his husband's daughter,  
and took their little 12 year old daughter  
with him.

## John Heron, Conservative Candidate

## BLAIRMORE THEFT

H. Thompson is Committed on  
a Charge of Appropriating  
\$375 From Former Employer

Blairmore, Oct. 8.—H. Thompson,  
an Englishman who formerly worked  
for S. Sargent, (who keeps a flour and  
feed store), was arrested yesterday  
for robbing the safe of \$350 cash and  
\$125 in negotiable papers. The  
mystery was solved in the police court  
today, when he was tried by Inspector  
Belcher, of the R.N.W.M.P.

In the evidence it was shown that  
he was paying debts and spending  
money lavishly. Thompson stated he  
had borrowed money from a Mrs.  
Grafton. When she appeared and  
gave evidence she denied having loaned  
the defendant money. Sufficient evi-  
dence was given to commit him and  
he was sent to Macleod to stand his  
trial.

E. G. C. Martin, of Frank, has been  
appointed justice of the peace for  
Frank and district. A. C. Beach having  
resigned that office several months  
ago on account of being appointed  
collector of customs. The amount of  
goods passed at Frank customs office  
during September was \$3,700.77; duty  
collected \$593.02.

**POLITICAL NOTES**  
Vote for John Heron and honest  
government.

Frank Oliver the once great defend-  
er of the people's rights, can now be  
branded the "Defender of grafters."  
How time does change.

The Liberals are on the down grade.  
The rails have been grazed, the hot  
air refuses to work, the brakes won't  
hold and the end is near—October 26.

Some years ago the sub-lane agent  
at Macleod converted government  
monies to his own use and quit the  
job. Mr. Oliver who had just become  
minister of the interior, promptly  
dismissed him and replaced him with  
a raise in salary. And still Mr.  
Oliver has the audacity to preach  
"purity in politics."

The Macleod Advance is a great rag.  
It is a Liberal paper for the "bread  
and butter." They say so, and we  
need not prove it. But they are off  
when they say that Duncan is a "re-  
spectable citizen." What made Mar-  
shall leave Canada? Look it up.  
Yet what he says is God's word to the  
Advance. Poor thing.

Since the journalistic giant flop of  
the Chronicle, editor Livingston is  
"hobnobbing" with Blairmore Mal-  
colm McKenzie and A. B. Macdonald,  
the Liberal candidate, while before  
the acrobatic feat "they seldom  
spoke as they passed by." No doubt,  
it is the soft hearts of McKenzie and  
Macdonald going out to soothe the  
soul (if he has one) stricken by the  
tremendous fall from the height of  
conscientious rectitude to the de-  
graded position of a paid hireling.

The other day a teacher in Leth-  
bridge was instructing a class on the  
finnish tribe and the teacher asked  
the class what was the most danger-  
ous fish known in all the world?

Little John Simmons at the foot  
quickly snapped his fingers. "Well,  
John," said the teacher, "name the  
class of fish." Little John answered  
"Grits." "Why, John," said the  
teacher, "they are men." "Oh,"  
said John, "but they grab at every-  
thing in sight." "Why, John," said  
the teacher, "you are thinking of  
sharks."

The Macleod Advance says that  
"the charge that the land is not being  
given to the settler but the speculator,  
is a slander and as such should be  
denounced." Sure the Advance is on  
the right track for once. That is  
proven that large areas are being  
given to supporters for 21 years and  
they are all settlers but the farmers  
are notified on the fence that there is  
"no fishing." The 44 ranches notice  
says so on the gate unless it is taken  
down for election purposes. They  
only have two townships and the  
Liberal candidate is the manager.

And again the son of senator Mackie  
and company has a day's ride of land  
on the boundary on the same terms  
(closed for 21 years and the privilege  
of purchasing at \$1 an acre) but the  
government built the fence to keep  
the American cattle off the grass.  
Mackie is a good manager, you bet.  
It costs them nothing and the people  
pay for it. He is a settler too, you  
know.

**HERRON'S MEETINGS**  
The electors of Coleman and the  
Peace will have the pleasure of hearing  
Mr. John Heron, Conservative candi-  
date, speak on the most important  
questions of the day next Wednesday  
evening, October 14, in the opera  
house, Coleman. Mr. Heron is a  
splendid speaker, and will have a large  
audience, on this, the first occasion of  
a public meeting in Coleman during  
the present campaign.

Mr. Heron will give an account of  
his stewardship since he has been a  
member of parliament. He will tell  
you of his work in the riding since the  
campaign opened. He will tell you  
about the timber and land sales of  
the Liberal government at Ottawa.  
Every elector is cordially invited to be  
present.

Reserved seats will be provided for  
the ladies.

Remember the date, Wednesday,  
October 14th.

John Heron the Conservative candi-  
date, will address meetings at the  
following places: Lethbridge, Oct. 10, 8  
p.m.; Frank, Oct. 10, 8 p.m.;  
Hillier, Oct. 13, 8 p.m.; Blair-  
more, Oct. 13, 8 p.m.; Halden,  
Oct. 14, 5 p.m.; Coleman, Oct. 14,  
8 p.m.

**OUT FOR THE OCCASION**  
Remember the date, Wednesday,  
October 14th.

The fellow with the most hood, is quite  
indignant that the "Miner" should  
dare to talk about scandal which is so  
prevalent in the Liberal ranks. Well,  
we do not wonder. It is really too  
bad. We should have known better.

**BLAIRMORE**  
James Dougal is taking in the fair  
at Spokane this week.

Mrs. J. A. McDonald is suffering  
from a severe attack of neuralgia.

John Harrington, Socialist candi-  
date for this constituency, addressed  
a meet in the opera house on Monday  
evening. This is the first time that  
a Socialist has addressed a Blairmore  
audience. The meeting was well  
attended.

Spence Lewis returned home on  
Monday with "Round the fast run-  
ning mare owned by H. E. Lyon.  
Rosalia," although very unlucky,  
having three times during the season  
been severely injured, was successful  
in the races she took part in, her  
record being four firsts, four seconds,  
two thirds and lost three. Mr. Lewis  
says that with the old time flying  
start he will back "Rosalia" against  
any horse in western Canada, up to  
three-quarter mile.

**INCREASES ITS CAPITAL**  
Montreal, Oct. 5.—Considerable in-  
terest attaches to the 25th annual  
meeting of the Canadian Pacific rail-  
way to be held on Wednesday night,  
because this meeting is to be made a  
special one for the purpose of consider-  
ing and if approved, authorizing the  
increase of the present capital stock  
of the company by \$50,000,000, which  
will make the capital stock of the  
company \$200,000,000.

Sir Thomas Shaughnessy, in a re-  
port to be presented to the share-  
holders, points out that there is no  
mediate necessity for this money,  
but the directors wish to be able to  
utilize it in such amounts from time  
to time as may be desirable in meet-  
ing the demands in improvements and  
extensions called for by the needs of  
the growing country.

Another important item to be con-  
sidered is the proposal of the directors  
to obtain substantial control, at an  
enormous cost of about \$2,000,000 of  
the Alberta Irrigation company.

FOR SALE—A cottage beautifully  
situated, comfortable and located in  
the residential portion of Coleman. A  
good cash proposition or easy terms  
will be given. S. Charles Brooks, "The  
Colon Woods," Brook street, Merritt,  
Victoria, B.C.

**Notice to the Public**  
I face this opportunity of informing  
the residents of the Peace that I am  
prepared to collect accounts, rents,  
etc. Anybody in this line entrusted  
to me will receive prompt attention.  
Commissioner for the Peace, H. GALT,  
Coleman.

**A Big Proposition in Underwear**

These Brains Too Weak.

"Look hyuh," said Moose, reading on the newspaper. "In New York city's puttin' up a thirty-story buildin', an' dey's beginnin' at the fifteen-story and wakin' up an' down. What keeps de middle 'round in de air while dey's wokin up an' down?" demanded his wife, suspicious.

"Ah—Ah I didn't think about dat!" sturned Moose, with widening eyes. Anyhow, dar's whar de brain uh de contractor come in. No nighthin' to do you or me an' powhl. 'Lough to plain dat!"—Brooklyn Life.

Corns cannot exist when Holloway's Corn Cure is applied to them, because it goes to the root and kills the growth.

She—Sir, I understand you said I had hard features.

He (suaively)—I plead guilty to sayin' you had a marble brow archin' up like cybrows, eyes like diamonds and lips like rubies.—Chicago Journal.

"You say you acted like a perfect idiot throughout the 'Burr vs. Honor. When he tips his hat to me and me not knowin' him, up with a rock and caves in his face."—Houston Post.

Willard—Papa, may I go swimming? Papa—Why, Willard, only an hour go you complained of a pain in your stomach.

Willard—That's all right, papa, I am swim on my back.—Chicago News.

**MAKE YOUR LIQUORS AND CORDIALS AT HOME!!**

## Our Letter From Paris

THE Parisian tailor has been very lucky this season, for the weather has been inclement in the extreme, and the charming spring frocks usually worn at this time of year by the elegantes had to be saved for some future occasion. Costumes of cloth and serge have been up to date, the only ones worn, and even dark colors are favored; but these tailored suits are interesting because they are quite different from any production of former years.

There are skirts of largely checked black and white linings, accompanied by jackets of fine black satin-faced cloth, cut swallow-tail and worn over a white satin vest and an old lace jabot. Sometimes they are trimmed with soutache and sometimes with passementerie. The tailors, too, have launched skirts of materials that have hitherto never been seen. They show alternating stripes of patterned and plain stuff, each matching each other. This material is pleated, and, with each motion, it produces an iridescent effect which is most original and chic. With these skirts a plain silk or cloth jacket to match is worn. The revers and vestings are embroidered and braided.

The tailors are combining novelties of great elegance, and nowadays the so-called classical tailor-made is never seen in a close-fitting variety. There are curved backs on tailored coats.

While serge suits are shown in the shops, although it has been too cold for them to be seen on the street as yet. These are made on the invariable style, heavily trimmed and bound with white soutache braid. Then there are others where the jackets are cutaway. These, too, are bound in soutache. The skirts for these suits are made walking length, and they are either circular or round.

A jacket seen of a new shape, by Doucet, is loose at the waist and cut round in front. Its originality con-

sists in a kind of draped front, so arranged as to form three deep folds fastened with three pearl buttons.

The tailors have certainly made the most of their popularity, for they have launched also new fashions for men, which have become instantly the rage among the beaux of Paris. According to the present fashion a man's coat must be cut tight at the waist and finished with wide skirts, while two pockets are cut across. The most fashionable colors are dark green, violet and brown. The vests are almost always made of a light material and bound all around, neck and all, with the same material in a much darker shade. If they are no longer pleated, they are trimmed with braid and many small buttons. The pleated skirts have now a wide fold at the back. They are higher at the waist line and loose, but very tight over the hips. With skirts cut on this plan very little trimming is used. When soutache is used as trimming it is in a small design; the Greek key is a favorite for a simple skirt. When skirts are long any kind of trimming can be used, and covered buttons are again in fashion—they look well on fancy tailor-made. Brass buttons, too, like those used on men's trousers, are original and new.

A particularly elegant tailor-made costume, seen at the Cafe Madride the other afternoon, was made with brown, green and gray mixed woolen material, trimmed with black silk soutache, finished down the front with a cambric ruche edged with Valenciennes. The green straw toque was trimmed with a torse of velvet and three or four bright green quills.

Elaine

## COSTUMES FOR SUMMER WEATHER

## To Help You Make a Shirtwaist

MANY women make their own shirtwaists and blouses who would never think of cutting out and stitching up a skirt of the simplest variety. One reason for this, I suppose, because the waist is in small sections and may be easily handled and conveniently tucked away in the workbag. While the skirt is bulky, refusing to be readily posed of, and can, by no stretch of the imagination, be called "fancy work".

The very best of patterns needs to be adjusted to the individual figure. Did it ever occur to you how unreasonable we are in what we require of a pattern? Every woman who buys a pattern expects it to fit her—and just think how many women buy the same pattern! If these same women tried on another's clothes, how well do you suppose they would fit?

It is well worth knowing where to make alterations so as not to disturb the lines and style of the pattern.

The line of the neck and the line of the arm-size should never be cut close to the pattern, for these are places where frequent alterations are made.

Collars are often hard to fit because the neck has been cut out too much. To adjust the collar properly to the neck, the waist should be tried on and the neck, which has been cut high, clipped little by little, and gently stretched until it settles into place without a wrinkle. Then the collar may be pinned about the neck, fitting it comfortably and smoothly, then pin its lower edge carefully to the waist neck. The very best collars are straight strips of material, curved gradually at the top to measure one-quarter to one-half of an inch higher

in the back than in the front. It is possible to fit these straight collars smoothly, provided the waist is cut high enough at the neck. A collar with a wide curve at its lower edge, which sets down below the throat line, gives the neck a thick look and robs it of all slender, column-like grace.

A common fault is to cut out the blouse too much under the arm. This done and the sleeve sewed in, the arm is pinned to the side and loses all freedom of motion; whereas, if the waist is cut high under the arm, the sleeve may be tight, yet the arm may be raised above the head with no disaster to the waist.

When the shoulder seams must be altered care should be taken to keep the line true and the position right—neither too far to the front nor to the back. At the base of the collar the neck line should be divided into three equal parts; the line from the shoulder seam to shoulder seam across the front should measure exactly twice as much as the line from shoulder seam to shoulder seam across the back.

The sleeve cannot be fitted with the necessary trim, square look. To adjust the waist at the belt line a narrow belt should be pinned about the waist line, and to this fulness should be pinned, keeping the seams and line of fulness as perpendicular as possible. Let the under-arm seam fall straight and let it be an easy fit from the armhole to the belt line.

Gather the fulness into about a seven-inch space at the belt line in front, three and a half inches each side the front. A five-inch space will hold the fulness of the back at the waist line.

COSTUMES for summer weather must not only include light dresses of silks and cottons, but also a few gowns that may be worn on cooler days at sea-shore and mountains, and for these there are no better materials than wool voile and light cashmere. There is no reason, however, why the gowns—no matter how warm they may be—need be either stiff or unbecoming, and there are a few suggestions on the page today for the making of such frocks.

In the first place, they should not be too short. Wool voile is a material that needs a little sweep to give the appearance of grace that belongs to it. Then the material is so elastic

that it will not hold without a belt line, so it is not the sort of thing that may be made in one piece to hang from the shoulders.

A wool voile in a soft shade of brown is made in pleats, while the vest effect is obtained by two bands of embroidery crossed in the front. These are edged with a narrow ruche of lace and fastened by four satin-covered buttons in black. The skirt is of black satin, while a band of the same finishes the collar at the top. This gown is most attractive, and might be worn in the afternoon if the occasion be not too formal.

A pretty model, which would be good for linen as well as voile, is in a shade of grayish blue. The long

line from the right shoulder across to the left side is good, and the little vest-like front is becoming. The guimpe itself is of tucked sheer linen, while the cravat is of black satin with a wide ruche of lace, which should match that used for the vest. If linen be used, the band may be of the same, and should be stitched. The gown is really charming, and it is so simple that it could not fail to be satisfactory.

A striped wool voile is worn over a guimpe of cluny lace. The neck and sleeve edging, as well as the band down the front, are of brown taffeta, which

material also covers the buttons. This frock would also be very attractive made of linen, gingham or cotton voile. In fact, any of these dresses may be made of other materials, although voile and cashmere are so soft and wear so long that they are very desirable. The first gown with the crossed vest would be beautiful of silk cashmere in a soft shade of champagne, and it would then be appropriate for quite dressy occasions.

Of course, a variation in the color of the mesh will do wonders toward helping the costume from plainness to dressiness, and when really handsome dresses are needed chiton cloth is the ideal material.

## SEEN IN THE SHOPS

Carried into a light and airy thing that would suit any dress.

MADE of waterproof silk to wear with summer gowns for driving and motor-ing. It seems as though in time we will all wear waterproof clothes entirely, and indeed it would be a clever idea, for it would save a great deal of the anxiety caused by the ever-tickling weather.

Important Accessory

GIRDLES with each end are becoming more popular than ever and they are shown in a large variety of styles—some of them tied in front, some in the back and some on the sides. They are made in all shades and widths of ribbon. There are many shapes, too, which make a specialty of building gir-dles to exactly fit the person desiring them. Girdles are an important feature of the costume, and good fit and good

style in this little accessory is worth consideration.

### Fluffy Neckwear

HUGE bows and frills of net have lace-trimmed or embroidered edges, and are worn with stocks of tucked net. Some of the very newest neckties are made of finest silk mouseline or dupp, fully eight inches in width, with deep embroidered edges. They are tied in two loops and two wide ends.

### Novelties in Jewelry

IN JEWELRY the best houses are showing all sorts of little odds and ends which help make the toilet complete. Little watch charms in the form of telegrams have a message engraved inside and one has merely to open the envelope to find it. They are made in enamel and gold. Then there are

arrows—long ones, broken at the middle—which one may stick through the edge of a straw hat to hold the veil in place. They are made in all sorts of jewelry designs and, as they do not tear the brim of the hat, they are very useful indeed. Many new shirt studs and shirtwaist sets are shown, jeweled with all sorts of precious stones. These are not only for women, but also for men, although, perhaps, they will be considered too dressy for the men to be satisfactory.

### Taffeta Supplanted by Satin

TAFFETA, which has played such a large and important part both in the making and trimming of clothes, is this season being supplanted by satin.

Satin is the vogue in black and in colors. For the dressier costumes satin is chosen, and it is seen in all the modish colorings. Simplicity is the dominating note in the construction of these costumes, for satin is a material that can well afford to be used untrimmed, so handsome is it.

Beautiful evening cloaks are of satin and, as trimming, it appears upon other cloaks of drapery type, whether for evening or day wear.

Gowns of voile and chiton and all diaphanous fabrics are bordered and finished with satin in matching or harmonizing hues.

Bias folds of black satin trim where like folds of taffeta used to adorn. Broad collar and small turned-back cuffs of black satin afford a smart finish to the tailored suit of serge, which may be further adorned with satin-covered buttons.

Girdles there are of black satin with cash ends, finished with fringe or tassels; these are worn even with tailored suits.

Smart stocks are fashioned of black satin. These are made to fasten in the back, and are finished top and bottom with frills of white tulle. Very chic are these worn with the semi-tailored shirt-waist or even with lingerie blouses.

There are all kinds of fluffy, ruffled affairs in the way of neck ruffs this season—ruffs that are made entirely of loops of soft satin ribbon, and others of tulle, lace, velvet ribbon or feathers. All are trimmed with a bow and ends of the satin ribbon—sometimes fastening the ruff together at one side and sometimes at the center back. These ruffs are made to match or harmonize with the costume, or, more often, to match the hat or its trimming. The ribbon bow and ends are either black or of a color to match.

Even petticoats this season show satin for their trim. This is because the vogue of the clinging gown renders tulle, inappropriate. The vogue of satin is influencing the fashions of other materials, which are assuming a gloss and shimmer quite foreign, but none the less attractive.

## Children's Frocks Easily Ironed

When Ironed the Under-Arm Seams are Buttoned.

A Little Frock which the Buttons at Both Shoulders.

With Buttons and Buttonholes from Neck to Hem.

Frocks which Buttons on Either Side from Arm Seams to Hem.

CHILDREN'S clothes must be washed! That is a statement which shows of no argument. In fact, it is an axiom. So, when selecting models for children, wise mothers have found that the most satisfactory are those which are easy to iron. This year the designers have realized the importance of the laundering quality, and they have put on the market several styles of frocks that may be laid flat upon the ironing board on Tuesday morning. These are open from top to bottom on both sides,

directly in front or directly in the back. If the dress is pleated, it is obvious that it simplifies matters greatly if the buttons are on either side, for it may then be laid flat on a large table; otherwise it is necessary to baste in the pleats so they will keep their shape. The buttonholes are covered with a dab, so that when the dress is on the child, there is no visible opening. This greatly adds to the style of the dress. A little frock fastened on one shoulder is so arranged that, by unbuttoning it, it may be slipped over the head to iron.

Of course, the great difficulty in ironing frocks for children is that the neck is too small to be spread over the board; this is obviated where the shoulder may be undone. When the buttons are down the front or back the child may be covered or uncovered, as desired, for large pearl buttons are being plentifully used this year. Many of the little dresses are made of plaid or plain gingham, and they are really as attractive as possible.

Some are made in one piece, with a kind of square hole cut out for the neck, which is filled up by a dainty cambric guimpe. If fulness is needed in the skirt, the frock is laid in pleats, with the upper part stitched whole to the waist line, while the skirt is allowed to fly; this is a very satisfactory way to make such a dress, and when the neck is trimmed with lace it may be held in place by a few tape loops.

plain gingham piped with bright tartan plaids, and still others are piped with white. Dresses for little boys are made of crisp and trimmed with checks. While bordered lawns make fascinating frocks for little girls, these may be guillemé of trimming. The guimpe must, of course, be separate, but it is not necessary for it to extend all the way to the waist, for it may be held in place by a few tape loops.

Coleman, Friday, October 9, 1908

### THE WORKING MAN

At a time when A. B. Macdonald (who of old used to import all his help from the east at low wages when every cow puncher in the country was getting from forty five to sixty dollars a month) is pressing himself on the attention of the labor men of the Pass as a friend of labor, and the Liberal party as the only true benefactors to the working man, it is of interest to see what the working men of the Calgary riding think. M. S. McCarthy, M. P., Conservative candidate for that riding, was recently tendered an ovation and address by all the railway men's unions in Calgary for the manner in which he supported the cause of those unions in the house of commons. The Liberal candidate had turned them down but M. S. McCarthy had done the right thing by the Union, and John Herron helped him to do it. This is practical work. This is work that is now bearing its fruit.

The Union men have seen what the Labor Congress at Halifax think of the Lemieux bill. The Unions have seen how the effect of the Compensation Bill put through in Alberta was nullified as regards a large class of workers, carpenters and bricklayers by the ridiculous thirty feet clause. And the Union men know which party is the better from their standpoint. Moreover, they know John Herron and can trust his work. It has been good in the past, and when the Conservative party is in power it will be better in the future.

The Miner believes that Unions are necessary and do great good. Without them the working man would not get a fair show. But it is a question whether it is wise for Unions to run candidates of their own. That is to say, in ridings where they do not stand at least an even chance of putting in their man. Their influence would be far greater in supporting one or other party entirely, and if the party does not treat them fairly, then support the other next time. The Liberal party has never been the friend of the Union man. Dishonesty, in what is after all but the Greater Union, the Government of Canada will not be tolerated by the lesser Unions. That is why John Herron will have the support of the working man, in Pass, or on prairie.

### THAT \$10,000

One of the chief complaints of Malcolm McKenzie and the other supporters of Mr. Macdonald is that Mr. Herron has drawn \$10,000 from the people of Canada. We can well imagine that some disgust would be felt by people of such kidney at the fact that at anyone but a grafter should be allowed to draw money. They forget to explain that Mr. Herron earned his money in four years faithful service in watching over the interests of the Canadian people, and in preventing many thousands of dollars being stolen by brother-in-law Burrows, Telford, Clifford Sifton and the rest of the soon-made millionaires that have sprung into being since the Liberal got into power.

The Miner ventures to say that Mr. Herron's actions in procuring the investigation into the lumber combine has been worth many hundreds of thousands of dollars to the people of Canada, and in particular to the people of the west.

Mr. Macdonald's company has the right to purchase over thirteen hundred acres of valuable farming land near Claresholm—land worth from \$12 to \$30 an acre, for \$1 an acre. What has he done to deserve to share in the boodle gathered by the big men in Liberal circles? THAT MIGHT BE OF INTEREST.

Honest John Herron earned his money. DID MACDONALD EVER EARN ANYTHING OF THE PEOPLE? Nothing except the doubtful compliment of being classed among the men who have robbed the people of this country of their lands.

### A SAMPLE FAT THING

A. W. Fraser, K.C., one of the Liberal candidates in Ottawa, was examined in court in Hull in the course of a law suit which a former business associate is pushing against Mr. Fraser for a share in profits which Mr. Fraser made out of a deal in timber limits. Mr. Fraser testified that timber rights for which he paid the Dominion Government less than \$4,000, he sold for \$100,000.

The fact is of importance because of the nature of the Liberal defense which has been made in Parliament in the last two or three sessions to the charges that the Dominion Government had proven false to its public trust distributing among political supporters vast quantities of valuable tim-

ber limits practically without competition and for the most trifling prices. The Liberal answer was that the limits were not really worth much—that the Conservative computation of values were absurd—that the public had got good enough compensation.

This sort of argument was difficult to expose. True, the Conservatives had plenty of proof that the lucky grantees were advertising or holding their cheaply-obtained limits at high prices—but the actual figures of sales were naturally difficult to get. Mr. Fraser in the witness box objected to stating the price for which he sold the particular limit under dispute, and was only compelled to do so after protest by his counsel.

But the actual price was got at, and in this case it proves that the Government gave to Mr. Fraser for under \$4,000, property which he soon sold for \$100,000.

Now, what do you suppose has been the total amount of timber limits, principally in the northwest, practically presented to Liberal politicians by the Laurier administration?

Over four millions of acres.

### A WISE GRIT

So Frank Oliver is not going to visit the Pass. Well, we rather think he acted wisely in deciding not to visit us. Mr. Oliver is the gentleman who toured the Pass just prior to the last elections, peddling coal rebates, false promises, and two-faced speeches.

Laboring men will remember how Mr. Oliver told them in his speech at Frank that he was a true friend of the laborer, that he would give anything and everything, but his life, for them and their cause. The following day the very same Oliver went to Pincher Creek and endeavored to "buy" the Conservative candidate, saying that it was up to the two great parties, at all hazards, to defeat the Labor candidate. Failing in this, he devoted his efforts towards retiring the Independent candidate, which proved successful and resulted in the defeat of Mr. Sherman. This man Oliver, who is now in southern Alberta as a representative of the Liberal government, is actually trying to make the people believe that the proven thief and graft in connection with the timber lands, are only dreamers; that they never did occur and that the Liberals are "the party of purity." This kind of gruff might go on, on the Peace reserve, but not with the whites.

### THE FRANK PAPER

Still the same old game of slanders, is being carried on by the Liberal press in this riding. The "Miner" expects better things of the Frank Paper, but it is apparent that the heat of the conflict has been too much for it and that seeing the attitude it supports has no chance of carrying the Pass or the election, it is willing to resort to any means to defeat John Herron. Having no argument to bring forward of weight, the same old stories of Chinese votes, of leases, etc., are deemed too stale for the people of the Pass. And now comes the statement that John Herron is raising the "race and religious cry." It is not worth while to give this comeback any particular attention but any Liberal in the Pass or any person who wishes to satisfy himself as to the correctness of any such reports, has only to put questions straight to Mr. Herron on the platform.

PUT THE QUESTIONS TO JOHN HERRON AND THEN SEE IF THE FRANK PAPER IS WORTHY OF BELIEF.

### WHERE ARE THEY?

[We do not hold ourselves responsible for the views of our correspondents.]

### EDITOR OF THE MINER

Sir,—In a late issue of the Frank Paper, "made by —," we read that "Owing to the splendid subsidy which Alberta receives in place of her lands, coal and timber, we have some splendid institutions." Now, if we have these institutions, the editor of the Frank Paper must be one of them. It is a great pity that Mr. Herron has not the support of this Frank institution. Its influence is tremendous, and besides Mr. Herron would get it so cheap, as this moral uplifter and public educator only asked \$300 from the Conservatives in order to shift his support from Marcelus to Kemmis in the last provincial elections. He would, no doubt, owing to the money stringency, support Mr. Herron at a lower figure, but Mr. Editor, the Conservatives, strange to say, refused to put up the money, which shows that they don't know a good thing when they see it. Then, again, he is dead in earnest in his crusade against the forces of evil. Take, for example, the case of a certain hotel in Frank. He (the institution) had strong grounds, as he thought, that drink was sold after hours. What did he do? In order to show us that he concentrated all his spare time to the public good, informed the police. Of course, these are people unkind enough to say that because the hotel man had withdrawn his printing from the institution, he took this course to get even.

A MINER  
Lambert, September 30, 1908.

### SYNOPSIS OF CANADIAN NORTH WEST LAND REGULATIONS

Any person who is the sole head of a family, or any male over 18 years of age, may homestead a quarter-section of available Dominion land in Manitoba, Saskatchewan or Alberta. The applicant must appear in person at the Dominion Lands Agency or Sub-Agency for the district. Entry by proxy may be made at any agency, on certain conditions, by father, mother, son, daughter, brother or sister of the intending homesteader.

Duties.—Six months' residence upon and cultivation of the land in each of three years. A homesteader may live within nine miles of his homestead on a farm of at least 80 acres solely owned and occupied by him, or by his father, mother, son, daughter, brother or sister. In certain districts a homesteader may, by standing may pre-empt a quarter-section alongside his homestead. Price \$10.00 per acre.

Duties.—Must reside six months in each of six years from date of homestead entry (including the time required to earn homestead patent) and cultivate fifty acres.

A homesteader who has exhausted his homestead right and cannot obtain a pre-emption may take a purchased homestead in certain districts. Price \$10.00 per acre. Duties.—Must reside six months in each of three years, cultivate fifty acres and erect a house worth \$500.

W. W. CORY

Deputy of the Minister of the Interior

N.B.—Unauthorized publication of this advertisement will not be paid for.

### SYNOPSIS OF CANADIAN NORTH WEST HOMESTEAD REGULATIONS

Any even-numbered section of Dominion lands in Manitoba, Saskatchewan and Alberta, excepting 1 and 24, not reserved, may be homesteaded by any person who is the sole head of a family, or any male over 18 years of age, to the extent of one-quarter section of 160 acres, more or less.

Application for entry must be made in person by the applicant at a Dominion Lands Agency or Sub-Agency for the district in which the land is situated. Entry by proxy may, however, be made at any Agency on certain conditions by the father, mother, son, daughter, brother or sister of the intending homesteader.

Duties.—(1) At least six months' residence upon and cultivation of the land in each year for three years.

(2) A homesteader may, if he so desires, perform the required residence duties by living on a homestead owned solely by him, not less than eighty acres in extent, in the vicinity of his homestead. He may also do so by living with father or mother, or certain conditions. A homestead in land will not be granted until the required residence is completed.

(3) A homesteader intending to perform his residence duties in accordance with the above while living with parents or on a homestead owned solely by him, must notify the Agent for the district of such intention.

# 12 Reasons Why You Should Buy Burton City Fruit Land

1. It is good soil, clay loam.
2. It is free from stone.
3. It is level land.
4. It is well watered. Running water can be put in every house.
5. The front on the lake.
6. The best of transportation. Two boats daily.
7. You are close to good hunting, fishing and boating.
8. The land is easily cleared.
9. It is the centre of the fruit growing district of B.C. with orchards on the adjoining blocks.
10. The title is good.
11. It is close to town and market.
12. Our price is low and terms easy.

## LIQUOR LICENCES Licence at Pincher City

On Saturday evening at 8 o'clock, the liquor licence commissioners for this district gave a hearing to the applicants, Messrs. John Henderson and F. M. Collins, for a licence for their hotels here. The meeting was held in the Bedford pool rooms, and besides the commissioners there were present licence inspector J. Whittaker and chief licence inspector W. E. Deyl of Edmonton, and a large number of the residents of this place as well as many others from outside places, which goes to show the intense interest manifested by all in this matter. Colin Macleod represented F. M. Collins, while Mr. Shepherd of Lethbridge, acted in behalf of John Henderson.

After a heated discussion for precedence of applications between the attorneys in which W. E. Deyl took a part. John Henderson's application was allowed to come up for hearing first, Colin Macleod withdrawing his objection in order to permit the hearing to proceed. Several witnesses were called whose evidence went to show that the signatures to John Henderson's recommendation were obtained within a area of something over 3,000 acres, while the act calls for same to be obtained within not more than 900 acres. It was also proven that Henderson's application was completed only a few hours previous to the sitting of the commissioners, while the act requires that same shall be forwarded to the territorial treasurer together with the sum of \$10, that he, the territorial treasurer, will cause same to be advertised and at least 24 days shall intervene between the publication of the advertisement and the date of the meeting of the commissioners, and all papers should be forwarded to the licence inspector of this district in time for such meeting. In this case the papers were handed in fifteen minutes before the time of the sitting of commissioners, to which no objection was made by the chief licences inspector W. E. Deyl.

F. M. Collins' application was then heard, the evidence furnished proved beyond doubt that all papers were in order, that the signatures were obtained within the area prescribed by the act, in fact the provisions of the act were lived up to the minutest detail, and it was conceded by all that the result of the decision when made by the commissioners would be a favorable one to Mr. Collins. The commissioners, however, reserved their decision until they could have an opportunity to count the dwellings here, which they did on Monday morning and finding the required number within the prescribed area, granted a recommendation to F. M. Collins at a meeting at Pincher Creek, on Monday evening.

**ACTIVITY AT THE OIL WELL**  
Messrs. Ferguson & Co., who have been prospecting for oil a mile south of Pincher City, are again making preparations for boring and are installing a much heavier outfit than they had at first. A large boiler of 30 horse capacity is now on the siding and being unloaded which will be placed in position alongside of the other one, making in all 60 horse power. Work is also progressing on a much heavier derrick over the well to enable them to make better time in drilling. Mr. McCutcheon is in charge of the work now and indicates that the work will be hurried along and drilling commenced as soon as machinery and derrick are completed.

## PINCHER CITY

Threshing has again commenced since the storm.

Colin Macleod was in the city last week on legal business.

Miss Hogan spent Sunday at T. J. Elliott's, Summerview.

Use "New Life," the world's greatest guaranteed cure for indigestion.

Miss Glass spent a few days last week with her parents at Summerview.

W. E. Deyl, chief licences inspector, of Edmonton, was a visitor here last week.

The friends of Mr. and Mrs. W. T. Dunphy regret to learn of the death of their infant daughter.

Messrs. Fowler & Co. are moving their drilling outfit to Nod Sinnat's where they will drill for water.

Why go dry? You do not need to. Pincher City is not dry. We struck a new spring this week.

Mr. Shepard of the firm of Simmonds & Shepard of Lethbridge, was here on legal business last week.

C. Harard will open his meat market here on October 17th, keeping a full line of prime fresh meat. Refreshments will also be served on and after that date. Meals, 25c.

Now that commissioners have recommended a licence for the Alexandra hotel and the papers gone forward, word should soon reach here granting the licence and put the place on an equal footing with other places.

Joseph McKnight was somewhat taken by surprise on Monday night, by having quite a number of friends collect at his residence where a thoroughly good time was had. Dancing was indulged in, and thus the season has opened for such interesting events.

Use "New Life," the world's greatest guaranteed cure for indigestion.

The wind mill for use in connection with the well and supply tank, at this writing is a week on the road and should arrive any day. When it arrives there will be no delay in getting same into working condition as the man to erect it is in the district now. By the beginning of next week there should be a drink here for "man and beast."

My TVar Grant of 320 Acres, at two dollars per acre. Please answer quickly and pick your land.

**CAPTAIN COOPER,**  
Box 412, Calgary, Alberta

**Application for Lease**  
**For Road Allowance**

Notice is hereby given that W. F. Dunphy of Pincher station post office, has made application to the Minister of Public Works, Edmonton, for a lease of the following road allowance, viz: On the east line of N. E. 1 of Section 23, Township 7, Range 30, west of the 4th meridian and running 1,500 feet south from his south-east corner.

Any protest against the granting of the above mentioned lease must be forwarded to the Minister of Public Works, Edmonton, within 30 days from date of this notice.

**W. F. DUNPHY**  
Dated at Pincher City, Friday, October 2nd, 1908.

# CATARRH OF HEAD

Which Peruna Relieved in a Short Time.

MISS SUSIE M. KINGSWORTH, 416 Quebec Street, London, Ontario, writes: "I began using Peruna last January when I had such a bad cold, and I could not get anything to help me. My nose and head were all stopped up, so that I could hardly get my breath. I thought at times that I would smother, especially at night. "I have no trouble with that now. The noise in my head has all disappeared. "I know Peruna will do just what you say it does. I cannot praise Peruna too highly, as it has done so much for me. I hope my letter will reach other sufferers. Mrs. S.J. Kountz, 1015 Bevel street, Nashville, Tenn., writes: "I have had a very bad cough nearly all my life, and I am forty-five years old. I have taken almost every kind of cough medicine that has ever been made, but none did me much good. I would have spells of coughing that I thought I would cough myself to death. I took Peruna, and last winter and this winter I have had no cough, and I know that Peruna cured me."

## GRANTING PATENTS.

Invention as Distinguished from Here Mechanical Skill.

A patent cannot properly be granted protecting the product of mere mechanical skill as distinguished from invention. Difficulty is frequently experienced in distinguishing between the two, and the supreme test for determining whether a particular device is the result of mechanical skill is not whether an ordinary mechanic could make the device if it were suggested to him, but whether he would make it without suggestions save those which are prompted by his skill and knowledge of his art.

For example, if a man constructs out of iron a machine which had previously been made out of wood he does not thereby become an inventor in a legal sense, because everybody knows that any constructor can build a machine out of iron instead of wood. But suppose that gunpowder had just recently been discovered and that the man who invented it had applied for and obtained a patent upon it.

He might have claimed, "I combine saltpetre, sulphur and charcoal in a certain way and produce a startling result," and it would be no answer, if an action for infringement were brought, for the infringer to say that every chemist could make the powder later he had been shown how, for, if every chemist did not have the knowledge as well as the skill, the originating of the powder constituted invention—Exchange.

## PECULIAR TREES.

They Yield Bread, Butter and Milk, Soap and Candles.

The breadfruit tree of Ceylon is very remarkable. Its fruit is baked and eaten as we eat bread and is equally good and nutritious. In Barbados, South America, is a tree which, by piercing the trunk, produces milk, with which the inhabitants feed their children. In the interior of Africa is a tree which produces excellent butter. It resembles the American oak, and its fruit, from which the butter is prepared, is not unlike the olive. Park, the great traveler, declared that the butter surpassed any made in England. In the forest of Sierra Leone is the cream fruit tree, the fruit of which is quite agreeable in taste.

At Table Bay, near the Cape of Good Hope, is a small tree the berries of which make excellent candles. It is also found in the Azores. The vegetable tallow tree also grows in Sumatra. In the island of Ceylon, the berries of the tree are used for candles, and tallow are extracted from its fruit, which is gathered in November or December, when the tree has lost all its leaves. The bark of a tree in China is the source of soap berry order also grows in the Cape of Africa. They are amazingly prolific, and their fruit contains about 38 per cent of caponin.

"A Bachelor and a Widow." "are the most sensitive people on earth. At any rate, the bachelors I know are, I dined with one not long ago. During the first part of the meal he seemed uneasy. "If any of my friends see me," he said, "they will think I am dining with some other man's wife."

"He pointed to my wedding ring. "Shall I take it off?" I asked. "No, would you mind?" said he. "Not at all," I said and slipped off the ring.

"Since then when going anywhere with that bachelor or any other bachelor I save him from embarrassment by taking off my wedding ring before we start. I find they appreciate my consideration for their feelings. Now, if that isn't sensitiveness raised to the ninth power I'd like to know what it is."

The Flow of Rivers. The flow of rivers, as might be supposed, is the slowest at the bottom of the water and highest at the top. The average velocity of the entire stream is found, as a rule, at about six-tenths of the depth. The friction of the bottom, which retards the movement of the deepest water is much greater, relatively to the whole volume of a stream, in a shallow river than in a deep one.

Womanlike. "In my opinion," said Jones, "a woman's club to be successful should aim at something far removed from female suffrage."

"I do not agree with you," retorted Miss Strong, with set lip. "That alone should be its object."

"Exactly," but if it aims at something else it is more likely to hit that."

Looking Backward. "Some people have queer ideas of sentiment."

"For example?" "I know a man who treasures the slipper his mother used to spank him with."

Reckless Expenditure. Diner—"When I took this place it was worth \$100 a day to live in. I have spent nearly \$1,000 on it. I cannot say I regret it. It would have been cheaper had you killed the dog?"

Not Deliberate. Wife—"I claim that the story you told me last night when you came home was a deliberate lie."

Hub—"And I say it wasn't! I never thought up one more quickly in my life!"

## Children! Do you want a Painting Book? It's Free.

Ask your mother to send us her name and address and we'll send you one of these splendid Painting Books with the colors all ready to use. We'll also send you a quarter-pound package of Celluloid Starch for your mother to try next ironing day.

## Celluloid Starch

Never Sticks. Requires no Cooking.

The Standard Starch Works, Limited, Montreal, Canada.

They Needed Other Things. Like most ministers' families, they were not extensively blessed with this world's goods. She, however, was the youngest of ten children until her father explained to her of the baby sister who had come to the world. "Well," she said, after due thought, "I suppose it's all right, papa, but there's many a thing we needed worse."—Delinquent.

Very many persons die annually from cholera and kindred summer complaints, who might have been saved if proper remedies had been used. If attacked do not delay in getting a bottle of Dr. J. D. Kellogg's Dysentery Cordial, the medicine that never fails to effect a cure. Those who have used it say it acts promptly, and thoroughly subdues the pain and disease.

He—Would your mother object to my kissing you? She—Mother! Why, she would not hear of such a thing!—Boston Transcript.

Wilson's Fly Pads kill them all.

"Do you believe in signs?" "Well, I must confess that when I see a man wearing one proclaiming that he is deaf and dumb I get a little shaky."—Philadelphia Ledger.

The best of Ceylon is in her tea. Nowhere else do they grow to such perfection. The best of Ceylon's tea are in "Salada."

Boy (to chemist)—Sixpence worth of cod liver oil, please, sir. An! I say, don't give me too much, cos night, what's got to drink it.

"Willie, did you push sister over?" "No, ma'am; we're playing street cat an' she's getting off like you all ways do."—Hornet Post.

## FALL CLOTHING.

A despatch just received from London, England, announces the departure from Liverpool of Mr. J. H. Greene, travelling representative of the World's Great Clothing House of Carson Bros., London, England. Mr. Greene will commence his business tour at Victoria, B.C., Aug. 29th, and continue eastward visiting various cities hereafter to be announced. Mr. Greene carries with him a full series of the latest designs in suits, overcoats and trousers, and is authorized to take measurements and orders for all sorts of men's clothing, which will be sent by mail from Messrs. Carson's warehouse in London, England, direct to the purchaser. Our readers are familiar with the attractive advertisements of Messrs. Carson Bros. appearing in our columns.

A well-known English Bishop some time since lost his third wife. A clergyman who had known the first wife returned from Africa and wanted to see the grave. He called at the cathedral and saw the verger. "Can you tell me where the Bishop's wife is buried?" "Well, sir," replied the verger, "I don't know for certain, but he mostly buries 'em at Brompton."—Cleveland Leader.

St. Laidore, P. Q. Aug. 1904.

Minard's Liniment Co., Limited. Gentlemen,—I have frequently used MINARD'S LINIMENT and also prescribe it for my patients always with the most gratifying results, and I consider it the best all-round Liniment extant.

Mother—Just run upstairs, Tommy, and fetch baby's nightgown.

Tommy—O, well, if you're going to be unkind to your new little sister, she'll put on her wings and fly back again to heaven.

Tommy—Then let her put on her wings and fetch her nightgown. PUNCH.

Men should look for this Tag on Chewing Tobacco. It guarantees the high quality of

Black Watch

The Big Black Plug.

What comes with the wind will go with the rain.—Irish Proverb.

## A Card Collection.

A remarkable collection of nearly six hundred packs of playing cards of all sorts and all nations has been presented to the Company of Makers of Playing Cards of England. The collection includes English cards illustrating proverbs, heraldry, fortune-telling and items of topical interest. The cards are the most interesting in the collection. Cut from what is presumably discarded, the forerunners of the modern playing cards used by the Sioux Indians, the Mexican game of cards is wonderfully attractive. The pack contains four suits—butterflies, fish, stars and animals. For the game of gams, the Hindu made use of 120 circular cards, hand-painted and lacquered.

Hubbard—Well, darling, I've had my life insured for \$10,000. Wife—How very sensible of you! Now I shan't have to keep telling you to be so careful every place you go to.—Louisville Post.

Faultless in Preparation.—Unlike any other stomach regulator, Parmenter's Vegetable Compound is the result of long study of vegetable compounds calculated to stimulate the stomachic functions and maintain them at the normal condition. It is a safe and proved their faultless character and established their excellent reputation. And this reputation they have maintained for years and will continue to maintain, for these pills must always be on hand as one of the list of standard preparations.

A barrister observed to a learned brother in court that he thought his whippers very unprofessional. "You are right," replied his friend. "A lawyer cannot be too barefaced."—Tribune.

## HOT WEATHER AILMENTS.

A medicine that will keep children well is a great boon to every mother. This is just what Baby's Own Tablets are. They keep the bowels regular, the stomach and bowels right, and prevent sickness. During the hot weather months stomach troubles are common to fatal diarrhoea or cholera infantum and if a medicine like Baby's Own Tablets is not at hand the mother and the baby are in a bad way. The wise mother will always keep a box of Tablets in the house and give them when children occasionally to clear out the stomach and bowels and keep them well. Don't wait until the child is sick—the delay may cost a precious little life. Get the Tablets now and you may feel reasonably safe. Every mother who uses these Tablets will find that the Tablets contain no opiate or harmful drug. Dealers sell the Tablets at 25 cents a box or you can get them by mail from The Dr. Williams' Medicine Co., Brockville, Ont.

"When I see what Barlow accomplishes I am forced to admiration," said Bunting. "He has great physical endurance."

"Yes," replied Gargyle, "that man has the constitution of a debutante."—London Telegraph.

Ten cents' worth of Wilson Fly Pads will kill more house flies than three hundred sheets of sticky paper.

Mrs. Nuritch—I told Widow Downes that the Yankee had and you'd give him a position. Mr. Nuritch—Well, I didn't give him no position. He came with a note from her, and she said in the note: "I must find employment for my boy, even if he works for a mere pittance." The nerve of her calling me a mere pittance!—Philadelphia Press.

No child should be allowed to suffer an hour from worms when prompt relief can be got in a simple but strong remedy—Mother's Graves' Worm Expeller.

Nurse (announcing the expected)—Professor, it's a little boy. Professor (absent-mindedly)—Well, ask him what he wants.—Boston Transcript.

Minard's Liniment relieves Neuralgia.

Dealer—Let me sell you some of our new patent-bait, sir. Fisherman—It is effective! Dealer—Effective! Why, I sold a man some of it last week and he got turned out of church for telling the truth about the fish he caught.—Cleveland Leader.

Your druggist, grocer, or general storekeeper will supply you with Wilson's Fly Pads, and you cannot afford to be without them. Avoid unsatisfactory substitutes.

## Spirit of the Open Lip.

The great charm of scenery and the country life is the moral feeling that seems to pervade it. This has prevailed through all English literature from Chaucer to Wordsworth and down to our own times. It has cast its spell over almost all of our Canadian poets, who have wood nature in the most perfect haunts and studied her minutest caprices.—Montreal Witness.

Sized Him Up. Briggs—"He made" I'll leaving my brain to the hospital and just got an acknowledgment from the authorities. Griggs—Were they pleased? Briggs—They wrote that every little boy.

Ebb Tide. Father (eminent stockbroker)—When the flow the sea rises, my boy; with the ebb it falls.

Son (a chip of the old block)—Then would be the time to buy, wouldn't it daddy?

What comes with the wind will go with the rain.—Irish Proverb.

The cock often crows without a victory.—Danish Proverb.

## THE HUMAN ENGINE.

To Operate This Masterpiece Air is the First Necessary.

Of all the engines cunningly devised by man not one can equal the masterpiece of construction, the engine of the human frame. To run that engine air is the first necessity. Construct it how you will, the greater part of the energy which feeds a power plant is lost before it reaches the applying machine. The body of man is the power of using energy really economically and efficiently. Its food is its fuel. To be available all the constituents of that food must be burned, producing heat and power. For that burning the oxygen of the air is essential. Equally true is it that nitrogen must be present to prevent the rapid combustion which would take place in oxygen alone. But, whether the combustion be fast or slow, the action is the same. The body burns the carbon and hydrogen of its food, and gives out the oxides of these substances, carbon dioxide (carbon acid gas) and hydrogen oxide (water). The water that is formed within the body by the burning of hydrogen is of comparatively slight importance in a consideration of the vital questions of the effect of city air upon the individual, but the other factor, the carbon dioxide formed in the body, is of great importance.—Hollis Godfrey in Atlantic.

## FOOD FOR CANNIBALS.

One of the Many Tragedies Enacted in the Pacific.

It is not so very long ago that cannibalism was rife throughout Polynesia, so that to be killed, cooked and eaten was the almost inevitable fate of sailors who chanced to be so unfortunate as to be cast away on any of the outlying little island groups. Perhaps the most awful tragedy of kind recorded in history is that which happened in connection with the loss of the St. Paul, Captain Pennard, while on a voyage from Hongkong to Sydney. This fine steamship carried, besides a full crew, 322 passengers, mostly emigrants.

On Sept. 30, 1858, she was wrecked on the island of Rossel, but all got safely on shore. A day after the captain and eight of the crew left the island in search of assistance and were picked up by the "Prince of Denmark" schooner. Eventually the French steamer Styx was dispatched to the island and brought away one emigrant. The remaining 323 had been massacred and devoured by the natives.—Pearson's Weekly.

## Philadelphia's Anti-Tipping Scheme.

A Philadelphia acquaintance has invented a way of getting rid of the "brushing" nuisance. He places a silver quarter in the hollow of his right hand, and turning to the boy who is pretending to dust just upon his clothes, says: "You are such a tremendous 'brusher' I will give you this money if you can brush it out of my hand!" "Yes, sir," answers the boy with a flourish, "I have tried it at previously. In that case he gives up the job."

As a general proposition, the most facile brushing will not sweep a coin out of a human hand. Why this happens to be true will be less understood after the reader has tried it himself. One might almost say that a coin cannot be brushed with a white broom of the hair as well as out of the palm of a hand.

Give the boy three tries and then return the money to your pocket.

## Why, of Course!

The editor of an agricultural paper was grumbling about a puzzling question he had received from a city man who had recently removed to the country. The inquiry was this: "Will you kindly tell me how long cows should be milked?"

The office boy, passing near, heard his superior repeating the question aloud.

"Scuse me, boss," he said, "but why don't yer tell him jes' de same's short cows?"—Judge.

## A Wart Superstition.

Boys in the west of England believe that by squeezing a mole to death between the hands and touching the affected parts with the blood that oozes from the mouth of the dying animal warts will disappear and will not reappear. The culprits are convinced that moles, worms and other subterranean dwellers have no feelings, and therefore it is not cruelty to put them to death in this way.

## Scarcity of English Humor.

It is to be feared that if the papers reserved a special corner once each week for the witicism of the week it would be often left blank. There is no wit to speak of today, only a feeble imitation of it which people are fond of calling the saving sense of humor.—London Saturday Review.

## Skilled.

"How did you acquire such skill?" asked the inquisitive one of the clever juggler.

"I have a natural talent—hereditary, I might say. My father used to eat peas with a knife."

Just a Change. "Poor man! Have you always been blind?"

"No, mum," answered Tired Thyme unthinkingly. "Last week I was lame, but dere wasn't enuff in it."

# Look for the Label

Stanfield's Underwear comes in three weights for winter wear.

And you can get just the weight you want by looking for the label on every genuine Stanfield garment.

Red label—light weight  
Blue label—medium weight  
Black label—heavy weight

Your dealer will likely have all weights. If not, he can get them for you.

**RUNAWAY FATALITY**  
Houston, Texas, Oct. 5.—In a runaway accident in the city park yesterday, H. W. Corless, a member of a leading hardware firm, was killed and Mrs. F. M. Trudaway and her two children were painfully injured.

**RECORD DISC THROW**  
New York, Oct. 5.—A world's record disc throw of 140 feet 10 1/2 inches was made by Martin J. Sheridan of the Irish American athletic club at the Pastime athletic club yesterday. The former record was 130 feet 11 inches made by A. J. Dearborn of the New York athletic club.

**DEATH OF BISHOP TIERNEY**  
Hartford, Oct. 5.—Right Rev. Michael Tierney, 68 years of age, bishop of the Roman Catholic diocese of Hartford, died at his residence here this afternoon from the effect of a stroke of apoplexy which he suffered during Saturday night last. The end came at 3:50 p.m.

**PICKS UP SURVIVORS**  
Mobile, Ala., Oct. 5.—A message was received here today by the collectors of the port which states that the Belgian steamer Tiflis arrived at Port Arthur to-day and reports picking up at sea, a raft having on board Alexander S. Johns, the sole survivor of the crew of the American schooner Bushak McCabe, and one dead body. Jones reported that his companion had died from exposure and exhaustion.

**KILLED INSTANTLY**  
New York, Oct. 5.—Mrs. Isabella Vancloaf, 74 years old, a widow, was killed almost instantly, and her son John Vancloaf, a wealthy broker, was injured yesterday in a runaway accident on upper Broadway. They were returning home when a fire engine, whistling frightened the horse and it ran away. Mrs. Vancloaf and her son were thrown from the carriage. Mrs. Vancloaf struck on her head and died a few hours later from a fractured skull. Mr. Vancloaf will recover.

**ATTEMPT TO LYNCH**  
Los Angeles, Oct. 5.—There was a scene of riotous disorder in justice Austin's court to-day in which several persons were injured in the attempt to lynch Edward Martin, the negro who assaulted Miss Edith Ralston, a concert singer at College Grove, on Friday night. Martin was spirited away to superior judge Wilbur's court where he pleaded guilty and was sent down for life.

**MRS. DUNSMUIR'S FUNERAL**  
Victoria, Oct. 5.—The funeral of the late Mrs. Jean Dunsmuir, Canada's richest woman, held this afternoon, attracted a large gathering of pioneers, one old man walked from Nanaimo to be present. Hon. James Dunsmuir, her son, who was made the defendant in a suit brought to ask for an accounting of the estate, which he was stated to have secured by misrepresentations, was not expected to be present owing to the family disagreement, but at the last minute he decided to attend and broke down during the service held at St. Andrew's church. It is understood that the law suit started by Mrs. Dunsmuir will be continued by her daughters.

### FIGHT OF FUR MEN IN SASKATCHEWAN

Regina, Sask., Oct. 7.—Word comes from the north that the election in the provincial constituency of Alberta has resolved itself into a struggle for supremacy between the two great rival fur companies. The Hudson's Bay company is backing Joe Nolan, a Battleford ferryman, who is a candidate, and Revillon Bros. are backing Benoit, who is a Prince Albert candidate. On the result of the election of Oct. 15 the prestige of the companies will rest, and the one suffering defeat will be given a crushing blow so far as the northern fur trade is concerned.

**\$10.00 CASH, \$10.00 A MONTH**  
Nothing cheaper in this country, for 10 acres of excellent fruit land, in B.C. No one else in the fruit land business has anything like this low price. \$10 per month, no interest, will make you independent in a short while, and lord of your own affairs. Apply at the Coleman "Miner" office.
